City of Clute Solid Waste RFP — Vendor FAQ

Proposal Timeline & Award

1. Can the proposal submission deadline be extended (e.g., to allow additional time for due diligence given the current turnaround)?

Unfortunately, no. The City Council needs of general information for cost consideration as it tries to determine whether or not the provision of Solid Waste services in house is financially viable and the turn for this decision is short as the Budget must be adopted in September.

2. What is the anticipated contract award date?

If Council opts to move to a privatized service, Staff anticipates an award date following the adoption of the Budget, most likely September 10, 2026.

3. What is the anticipated contract start date?

The City would anticipate the transition of service within 90 to 180 days from the start of the Fiscal Year (October 1, 2026).

Residential Collection Service

4. What type of residential collection service does the City currently use — rear-loader with helpers, or automated side loaders — and would the City consider transitioning to automated side-load service (with carts supplied at no additional cost)?

The City currently uses rear loading (with tippers) manual collection. Yes, the City is open to transitioning automated side loaders with carts.

5. Does the City require carts or personal cans for residential collection service?

Currently the City does not require carts but has a limited number of residential customers that use carts. It anticipates transitioning to carts if the service is outsourced.

6. What are the current residential service days, and would the City consider spreading collection over four days per week (e.g., Monday/Thursday and Tuesday/Friday, with Wednesday open)?

The City's current operational calendar sees pickup on a Monday/ Thursday and Tuesday calendar between its four collection zones for standard residential pickup. Heavy trash and brush is collected across four zones on a rotating weekly basis.

Commercial Service Details

1. Can the City provide a breakdown of commercial containers (front-end-loader/FEL) by size and collection frequency (days per week), to support route and volume planning?

The City currently only offers side load commercial dumpster service. There are a couple of non-exclusive franchisees that operate front end loading trucks, but the City does not have specific information on the size and collection frequency for those accounts.

For it commercial customers, the City offers 3 and 4 yard dumpsters, with a collection frequency as low as 1 time per week and as high as 6 times per week.

2. Is roll-off service included within the commercial service scope, or is it excluded from the franchise agreement entirely?

Currently no. But we encourage respondents to include this service as an alternate.

RFP Administration

3. Can the City provide an address listing to support route-count estimation?

Please find attached a schedule of Commercial service collected by the City. There currently is not a route count for individual Residential service, the City is divided into four districts for collection that is roughly divided geographically and not by population counts. A map of those districts and schedule is likewise attached.

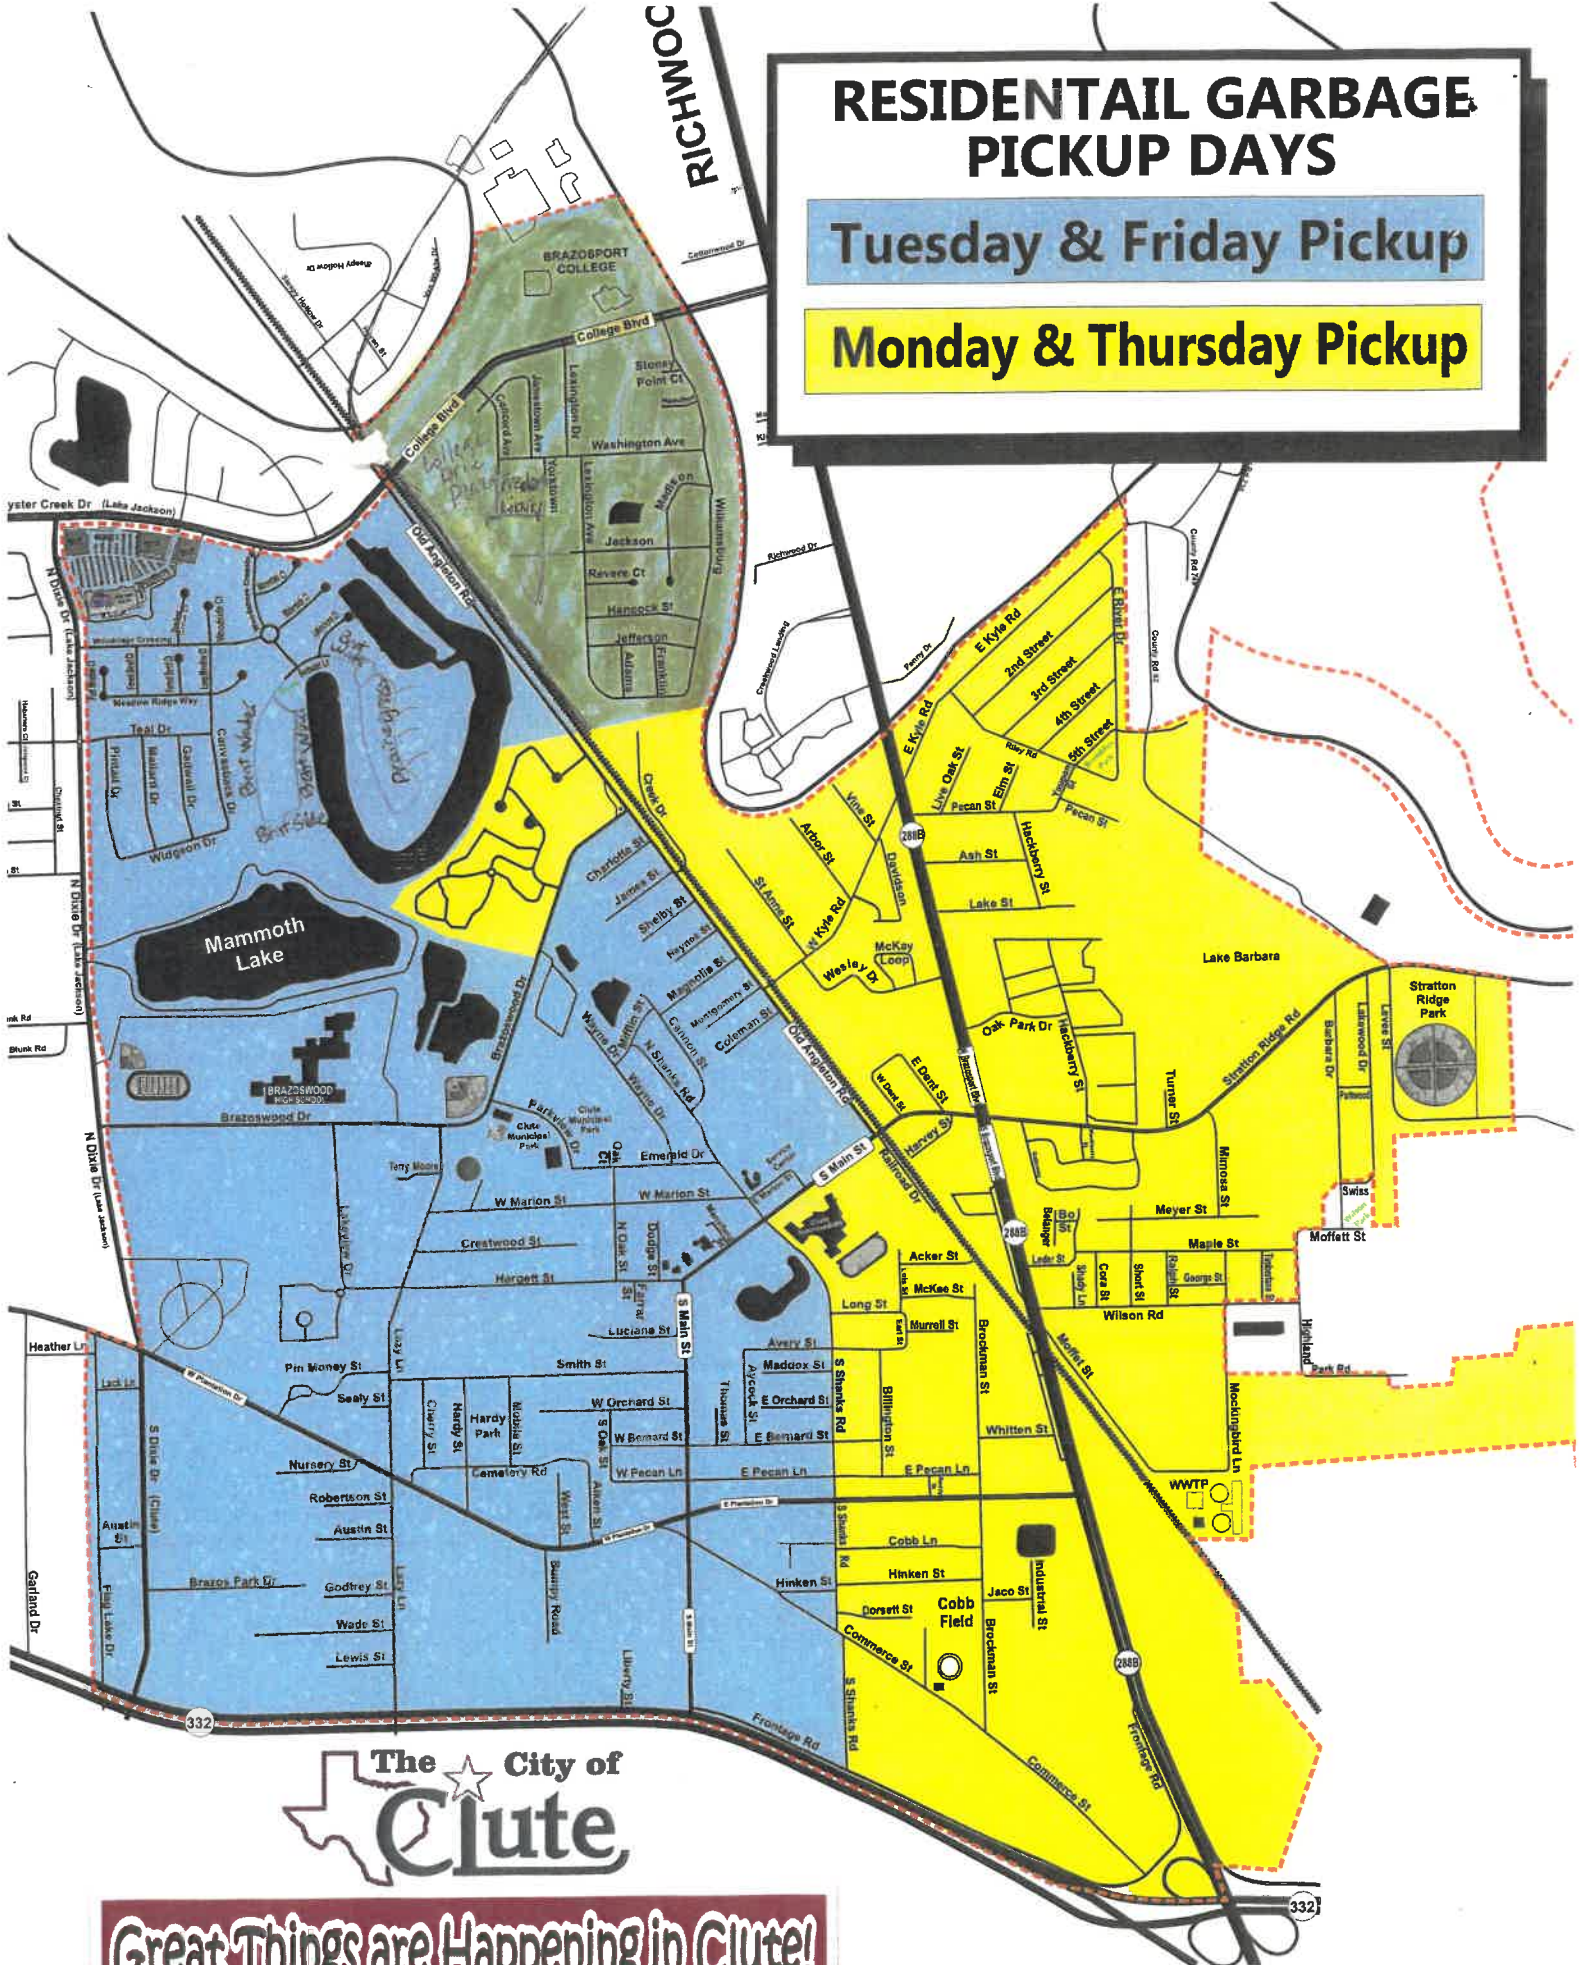

4. Can the City of Clute logo be used within a respondent's proposal?

Yes.
